

MUHAMMAD HAMMAD

Full Stack Laravel Developer | Software Engineering Student | Researcher | Founder of [PKTools.tech](https://pktools.tech)
Hammadjanjua004@gmail.com | +92 325 9964045 | [Hammadjanjua.me](https://hammadjanjua.me) | Lahore, Pakistan

PROFESSIONAL SUMMARY

Full Stack Software Engineering student (5th Semester) with 1+ years of practical development experience across Laravel, PHP, JavaScript, React.js, Vue.js, and Supabase. Founder of PKTools.tech, a serverless developer-tools platform, and builder of production e-commerce and industrial-automation web platforms. Experienced in website designing, SEO, deployment, and end-to-end project ownership.

PROFESSIONAL EXPERIENCE

Bitlogicx — Web Developer Intern

2 Months

- Worked with Laravel and modern web technologies across backend development, API integration, testing, and deployment.

Freelance Full Stack Developer

1+ Years

- Developed and shipped web applications end-to-end, managing projects from design through deployment for multiple clients.

Founder & Lead Developer — [PKTools.tech](https://pktools.tech)

- Founded and independently developed PKTools.tech, a fast, serverless platform providing 130+ free developer-focused utilities and productivity tools.
- Designed and optimized the platform architecture for high performance, responsiveness, and scalability.
- Managed the complete development lifecycle, including architecture, deployment, and continuous improvement.
- Leveraged modern web technologies to deliver lightweight, efficient, user-centric solutions.

EDUCATION

Bachelor of Science in Software Engineering (BSSE)

In Progress

Superior University, Lahore — 5th Semester

PROJECTS

Dua Trends — E-commerce Web Platform

Full Stack Developer

- Built and maintain a women's clothing e-commerce platform (lawn suits and formal wear) on a Supabase backend.
- Implemented a WhatsApp-based checkout flow and an admin panel for order and catalog management.
- Developed a comprehensive SEO strategy and keyword map to improve Google search rankings across Pakistan.

Live Website: <https://duatrends.com>

J-Tech Control — Industrial Automation E-commerce Platform *Full Stack Developer*

- Built a web platform for Pakistan's industrial automation store, listing 3,200+ verified components including Siemens/Delta PLCs, VFD inverters, sensors, and circuit breakers.
- Implemented product catalog, cash-on-delivery checkout, and inquiry workflows for custom control-panel fabrication services.
- Optimized site metadata and structure for search visibility within the industrial automation and electrical components market in Pakistan.

Live Website: <https://jtechcontrol.com>

Toolskt.com *Full Stack Web Developer*

- Contributed to the development and enhancement of a utility platform featuring 400+ web tools.
- Worked on frontend and backend functionalities, improving performance and user experience.
- Performed testing, debugging, and optimization to ensure reliability and scalability.
- Collaborated on implementing responsive interfaces and seamless tool integration.

Rayyan Foundation Website *Full Stack Web Development | Responsive NGO Website*

- Designed and developed a modern, responsive website for Rayyan Foundation with clean UI/UX.
- Ensured fast loading, cross-device compatibility, and accessibility standards.

Live Website: <https://rayyanfoundation.vercel.app/>

QR Forge Pro *Frontend Development | QR Code Generator*

- Developed a modern QR code generation platform with customizable options and a responsive layout.
- Focused on usability, performance optimization, and interactive design.
